CUTTING EDGE SAWMILL

BLADE SHIPPING CHECKLIST

BLADE SHIPPING CHECKLIST

Use this checklist before boxing up your blades and sending them to us.

Name: _____	**Date:** _____
Phone: _____	**# of Blades:** _____

BEFORE YOU BOX YOUR BLADES

☐	**CLEAN BLADES** Remove heavy sawdust, pitch, mud, and loose debris.
☐	**DRY COMPLETELY** Make sure blades are dry before packing to help prevent rust.
☐	**COIL AND SECURE** Coil blades safely and secure each coil so it cannot spring open.
☐	**PROTECT THE TEETH** Keep sharp tooth edges from rubbing directly against other blades or the box.
☐	**PACK IN A STURDY BOX** Use a strong box sized closely to the blade coils so they cannot shift excessively.
☐	**FILL EMPTY SPACE** Use packing material so the blades stay stable during shipment.
☐	**INCLUDE YOUR CONTACT INFO** Put your name, phone number, email, and return address inside the box.
☐	**INCLUDE BLADE DETAILS** If known, include blade length, width, tooth spacing/TPI, manufacturer, and quantity.
☐	**CHOOSE A RELIABLE SHIPPER** Use a carrier that provides tracking.
☐	**KEEP YOUR TRACKING NUMBER** Save the tracking number until we confirm your blades have arrived.

QUICK PACKING REMINDER

Blades should arrive clean, dry, secured, and unable to move freely inside the box. A tightly packed shipment helps protect the blade teeth and makes the box easier to handle.
